Treat bruises on your skin by limiting the bleeding. You can do this by cooling the area with a cold compress (a flannel or cloth soaked in cold water) or an ice pack wrapped in a towel. To make an ice pack, place ice cubes or a packet of frozen vegetables in a plastic bag then wrap it in a towel. Hold this over the area for at least 10 minutes.

Health Guide: What is Nail Trauma? A fingernail or toenail can be injured by a blow to the nail or by closing the finger or toe in a door or drawer. This kind of trauma commonly results in blood under the nail, a condition called subungual hematoma. Nails also can be accidentally torn or split, or a splinter can get under the nail.
