To make paper flashcards, write a GRE math formula on one side of a note card, and what and how it's used on the other side. You'll also want to note what each of the terms in a formula means (e.g., the m in the slope formula is the slope). If you have extra room, draw a diagram or two to illustrate what the formula looks like.

The 4-MAT system Here is a system that can help you format your presentation rapidly and make it understandable to the largest number of people. Bernice McCarthy developed the 4-MAT model, which is based on NLP and the work of David Kolb. Kolb noticed that learners have different preferred learning styles.
