### Two Step Equations Worksheet With

Two step math equations are algebraic problems that require you to make two moves to find the value of the unknown variable. For example, using the equation  $3x + 5 = 11$  we will need to perform two steps to find the value of  $x$ . The first step would be to get the constant values of the equation by themselves. In this case 5 and 11 are our constants.

### Two-step Equations (Worksheet Bundle) | Teaching Resources

The main difference between one-step equations and two-step equations is that one more step you need to do in order to solve a two-step equation. That additional step may be something like multiplying the variable by a certain number to get rid of a fraction in front of it. Otherwise, the rules are the same as before and these equations are just as easy to learn and solve as are the one-step ones
