Orchids generally appreciate a 10-15°F drop in temperatures at night (6-8C). Most of the commonly-available orchids are chosen to make growing orchids for beginners easy, which means that if you got your plant at a supermarket or orchid mass-market place, it will probably do well in temperatures that are comfortable for humans. Humidity

Growing Orchids for Beginners - Orchid Care Tips

Avoid the beginner's mistake of buying orchid fertilizer. It will not help your plant! The secret to watering any orchid is to water thoroughly with good quality water. Never use water that has been through a water softener. Soak the orchid plant thoroughly and then water again thoroughly again after 20 minutes or set the whole plant and pot in a bucket of water for 20-30 minutes.

The first thing you need to check is whether your orchid is an epiphyte or a terrestrial. If it's an epiphyte, then you should know that these orchids are often found growing on trees, so they don't need any potting mix. If your orchid is a terrestrial then you'll want to check the guide above to figure out what soil you need.
